

TP-PANELS are made of resin cement and selected aggregates cast onto corrugated aluminium sheets. Stain proof, UV stable and suitable for both indoor and outdoor use, they are 50 percent lighter and significantly stronger than conventional stone and terrazzo slabs. The panels can be used as structural elements thanks to connection pieces set within the material and positioned at will. TP-PANELS are entirely cast, cut and polished by hand in Europe by skilled craftsmen.

Material	Engineered Stone (Marble, quartz sand and polyester resin) and Aluminum Sandwich Panel
Colours	All TP-STANDARD colour recipes
Dimensions, Weights	1300×1300×30 mm, 73 kg 900×1600×30 mm, 63 kg 900×2000×30 mm, 80 kg
Custom Sizes & Colours	Available upon request
Origin	Spain

NOTICE

As terrazzo is hand made, it may show slight variations in grain size, colour, cement mix and occasionally small superficial cracks. These variations are inherent to the nature of the material and should not be seen as defects or quality problems. Like any other natural stone, terrazzo (engineered stone) requires basic maintenance and attention to ensure its longevity and beauty. Use only products which are stated to be suitable for engineered stone or natural stone care.
